EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William W. Haefliger on 03/16/07.

The application has been amended as follows:

Claim 1, line 16, "and" has been deleted and ---with--- has been added after the phrase for operative attachment.

Reason for allowance

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was a brace having a strap structure including a first portion extending in a generally longitudinal direction, said structure defining a through slit extending diagonally through the strap first portion at an angle

α between 40° and 50° relative to said longitudinal direction, said strap second portion extending through the strap first portion via said slit, and folded at the slit to extend downwardly and normal to said longitudinal direction and at one side of the ankle, then underfoot, and then upwardly at the opposite side of the ankle for operative attachment with said first portion in use, in combination with the other elements (or steps) of the brace and method recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

2. The drawings filed on 1/9/04 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

3. The drawing are objected to because Figure 5 indicates elements by description of the device and not by reference numbers with corresponding description of the reference number in the specification.
